

Research and University

The university and the academy started around people capable of generating knowledge That influenced life and thinking. The modern university shaped by Humboldt was focused on the production of knowledge through experimentation and freedom of study. However, the academic year THROUGHOUT history has constant challenges Suffered Associated With the social and economic contexts, and challenges These Are Those That Have Led to ITS evolution.

RESUMEN

The university and the academy were born around people capable of generating knowledge that influenced the life and thought. The modern university, shaped by Humboldt, was focused on the production of knowledge through experimentation and freedom of study. However, throughout the academic year history he has suffered constant challenges associated with the social and economic contexts, and these challenges are those that have led to its evolution.
